Excerpt: .consisted of 42 pounds, representing not fewer than 100 fish. It is fair to say that this catch was made by a party of several persons. It is said that the Calico Bass will bite readily at spawning time, but that only the males will do so. They will take a worm, small minnow, or a piece of fish. In the winter and late fall they bite readily at a small minnow, such as the straw-colored minnow (*Notropis blennias*), the blunt-nosed minnow (*Pimeplwles notatus*) or the skipjack (*Labidesthes sicculus*). This fish will take not only a small live minnow, but it will take a dead minnow, a worm, a piece of fish or a grub. It is often taken with a small trolling spoon and we have occasionally taken it with a small artificial fly. And we recall one instance when it was taken...
