

## Strain Self-Sensing Polymer Nano-Composites

Filesize: 5.71 MB

### **Reviews**

*Extremely helpful to all class of individuals. It really is written in straightforward terms instead of difficult to understand. I am just happy to explain how this is the finest publication I have got read inside my own lifestyle and might be the very best ebook for possibly.*

*(Dr. Meta Smith)*

## STRAIN SELF-SENSING POLYMER NANO-COMPOSITES

To get **Strain Self-Sensing Polymer Nano-Composites** PDF, you should access the button listed below and save the ebook or get access to other information which might be in conjunction with STRAIN SELF-SENSING POLYMER NANO-COMPOSITES book.

LAP Lambert Acad. Publ. Jul 2011, 2011. Taschenbuch. Book Condition: Neu. 222x151x12 mm. This item is printed on demand - Print on Demand Neuware - The present work aims for making a proper composite which can be used to monitor its own condition. These materials are called self-sensing composites. In order to achieve this target carbon nanotube (CNT) composites, due to their extraordinary electromechanical properties, are most desired. CNT composite self-sensors are going to be replaced by fibre optic sensors, suffer from high cost, low durability, small sensing volume and mechanical property loss. The most important application of self-sensors is in civil engineering, but this work tries to design a system able to self-sensing of damage because of the practical importance of structural health monitoring, which is needed for aircraft hazard. Referring to Literature indicates that there are two important concepts (Tunnelling effect and Bandgap structure), which explain for the conducting behaviour of CNT semi-conductors. As changing the bandgap structure of CNTs by a simple deformation of composite is approximately impossible, tunnelling effect has the most influence on the electrical response of a composite as a function of deformation. 76 pp. Englisch.
