Excerpt from book: CHAPTER III PLANT STRUCTURE Just as a locomotive engineer needs to know the parts and arrangement of his engine to keep it working smoothly, so the farmer must understand the mechanism and function of plants in order to remove obstacles in the way of their best development. Plant structure determines in a large measure plant functions, and economic production depends on the unobstructed activity of life processes. Therefore, a clear understanding of the kind and location of activity that goes on within the plant will enable the farmer to handle his crop more satisfactorily. This is particularly true under abnormal conditions such as plant diseases, the nature and location of which must be understood for effective control. 18. Cells (Fig. 4). ? Roots, stems, leaves, bark, and flowers are so readily distinguished that everybody knows about them. Rings in wood, rind of melons, bran of wheat, and pith...
